TEAM WENDY MASK STRAP

The Apollo Team Wendy Mask Strap 20mm (Pair) is a purpose-built mask retention system designed to securely integrate compatible diving masks with Team Wendy Rail 3.0 helmet systems. Developed for military, tactical and maritime operations, the system combines elasticated 20mm mask straps with genuine Team Wendy Centre Release Clips, providing secure helmet-mounted mask retention while allowing flexibility and comfort during operational use.

Designed for operational efficiency, the elasticated strap design helps maintain consistent mask tension during swimming, diving and dynamic mission activities whilst also allowing operators to quickly transition between mission phases while maintaining positive mask retention. The lightweight, low-profile design minimises snag hazards and provides a secure connection between the mask and helmet platform during demanding operational activities.

FEATURES

- **Compatible with Team Wendy Rail 3.0 Systems –** Integrates directly with Team Wendy helmet rails
- **Centre Release Clip System** – Enables rapid attachment and removal of the mask
- **Elasticated 20mm Strap System –** Maintains consistent tension and secure mask retention while accommodating movement, helmet fit variations and operational equipment loads.
- **Secure Mask Retention –** Helps prevent mask loss during maritime and tactical operations
- **Low-Profile Design –** Reduces snag hazards and interference with other equipment
- **Lightweight Construction –** Minimises additional load on the operator
- **Quick Equipment Transitions –** Supports rapid movement between operational tasks

OPERATIONAL ADVANTAGES

- **Enables secure integration** of diving masks with Team Wendy helmet systems
- **Facilitates rapid mask attachment and removal** during mission transitions
- **Improves equipment retention** during maritime, boarding and tactical operations
- **Low-profile design** minimises interference with communications, lighting and other helmet-mounted equipment
- **Durable construction** suitable for repeated operational deployments
- **Elastic retention system** maintains secure mask positioning during swimming, climbing, boarding operations and high-mobility activities while improving comfort and reducing pressure points.
- **Supports streamlined equipment management** in demanding environments

SPECIFICATIONS

SPECIFICATION	DETAIL
Clip Type	Team Wendy Centre Release Clip
Rail Compatibility	Team Wendy Rail 3.0
Configuration	Pair of Mask Straps
Construction	Durable Lightweight Webbing
Colour	Black
Helmet Compatibility	Team Wendy Compatible
