

Features and benefits by each Boot (LAND):

Ferdelance - Suede

- Using the same upper pattern as our popular Odhin model, the Ferdelance has been made into a combat ready boot using the highest quality Vibram sole unit.
- High traction non squeak Vibram outsole and midsole unit. This provides the best combination of traction and cushion in a boot today
- Stain resistant desert tan suede upper
- Cordura ventilation ports throughout the boot provide breathability not found in most boots
- Double reinforced lace loops are made not to fail in the field
- Variable Sausage Laces will not come untied
- Reinforced climbing rubber toe and heel to help when scaling walls
- Dual density Ortholite cushioned footbed with Dril-lex lining for increased wicking and foot comfort.

Sizes: 7 – 11 ½, 12, 13, 14

Ferdalence – Black

- Using the same upper pattern as our popular Odhin model, the Ferdalence has been made into a combat ready boot using the highest quality Vibram sole unit.
- High traction non squeak Vibram outsole and midsole unit. This provides the best combination of traction and cushion in a boot today
- Supple synthetic PU upper will not absorb water and will dry quickly when wet, this makes for one of the lightest technical boots on the market
- Mesh ventilation ports throughout the boot provide breathability not found in most boots
- Reinforced lace loops are made not to fail in the field
- Variable Sausage Laces will not come untied
- Reinforced climbing rubber toe and heel to help when scaling walls
- Dual density Ortholite cushioned footbed with Dril-lex lining for increased wicking and foot comfort.

Sizes: 7 – 11 ½, 12, 13, 14

Bushmaster - Suede

- Using the same upper pattern as our popular Abyss model, the Bushmaster has been made into a combat ready boot using the highest quality Vibram sole unit.
- Mid cut height for those wanting a “faster boot”, made especially for Special Forces units needing the best equipment.
- High traction non squeak Vibram outsole and midsole unit. This provides the best combination of traction and cushion in a boot today
- Stain resistant desert tan suede upper
- Large mesh quarter panel with leather reinforcements make this boot cool even in the hottest conditions.
- Reinforced lace loops are made not to fail in the field
- Variable Sausage Laces will not come untied
- Reinforced climbing rubber toe and heel to help when scaling walls
- Dual density Ortholite cushioned footbed with Dril-lex lining for increased wicking and foot comfort.

THOR TC

- The boot used by the most elite Special Forces unit in the world, the THOR TC is one of the fastest boots on the market today.
- Extremely sticky Vibram rubber outsole with a large rubber toe bumper that will not squeak. This sole unit works great on any surface, be it a rock wall or elevator shaft
- High abrasion Roc-tuff® toe and heel resists scuff
- Two tone Cordura quarter panels for increased abrasion resistance. This boot is constructed to breath, your feet will be comfortable the minute you put the boot on your foot!
- Heavy duty nylon lace loops are triple needle stitched for durability
- Rounded metal top D-Rings, will not snag on parachute lines
- 2 color climbing shoe lace
- Dual density Ortholite® cushioned footbed with Dril-lex® looped wool lining for increased wicking and foot comfort.

Sizes: 7 – 11 ½, 12, 13, 14
