

All Terrain Boots (ATB)

Designed for water operations

ATB

The ATB is designed to give the operator excellent grip on boats, ladders, swimming, diving, rocky shorelines and on land. It has been specifically designed for water operations and includes 3mm stretch sock-design which contours to all shapes and sizes.

Key Features:

- **Lace-up overshoe provides firm ankle and foot support while reducing accumulation of water in the boot.**
- **Reinforced toe cap**
- **Heel lug prevents fin straps from slipping**
- **Extra heavy, low profile non-slip sole**
