When you're about to slide down a rope, 60 feet off the ground... You need one you can rely on... **Fast.**

JEYCO'S FAST ROPE

The JEYCO Fast Rope:

- **Easy to Inspect by Operators and Maintenance Personnel**
- **With NO Heavy Metal parts. No X-Ray checks needed.**
- **Approved and Used by the Australian Defence Force and all Australian State Police.**

Developed by Jeyco Mooring and Rigging in Western Australia, together with Gleistein Ropes of Germany and Puget Sound Ropes of the USA.

Jeyco's unique design uses Puget Sound Ropes PLASMA High Modulus PolyEthylene (HMPE) as the interface between the Gleistein Rope's manufactured Fast Rope and the Transport System. All to the exacting standards of EN 919-1995.

Most importantly, it can be completely customised to your requirements. eg: For use as Fast Rope Insertion-Extraction System (FRIES)

Length	Part Number
36.6m (120 ft)	JMFR-120-04GLE
27.5m (90 ft)	JMFR-090-04GLE
18.3m (60 ft)	JMFR-060-04GLE
10.0m (32 ft)	JMFR-032-04GLE
