# Military Tactical Equipment

## Bio-Metal PRO STEALTH ANTI-REFLECTION STAINLESS STEEL

### WORLD FIRST ANTI- REFLECTIVE UV MASK

*Apollo has specifically developed this product to fit the demanding roles of Special Forces Operators worldwide*

# Military Tactical Equipment

## Bio-Metal PRO **ARUV** STEALTH ANTI-REFLECTION **UV** STAINLESS STEEL

### Features:

#### ARUV Lens - Anti-Reflective UV (Reduces surface reflection by up to 90%)

Reduces the chance of attracting attention caused by lens reflection from sunlight or searchlights while on covert missions.

UV420 Lens provides greater protection against the types of light that can damage the eyes.

#### Angled Lenses

Angled lenses push any residual reflection downwards rather than straight back at the subject.

#### Non - Reflective Matt Finished External and internal Silicon Skirt

Eliminates all reflections both internally and externally.

Unique shaped silicone skirts bring unparalleled comfort, fit and sealing.

One size fits 90% of face shapes

Angled lenses direct any residual reflected light, down and away from the subject being viewed.

#### Matt finished (Stainless Steel Frame) - Superior Vision

Building the frame from Stainless steel allows a range of lighting systems, cameras or other accessories to be easily attached to the mask.

Thin bridge section between the lenses allows the eye to be centrally located in each lens thereby increasing field of vision dramatically over conventional styles.

#### Lens Suite - Mask comes standard with ARUV Lense - others optional

- ARUV (Anti-Reflective UV Lens)
- P (Polarized Lens)
- O (Optical Lenses available)
- S (Standard Tempered Glass Lens)

#### Accessories

- Go Pro Mount
- Frame Mounted Light Mount
- Strap mounted light mount

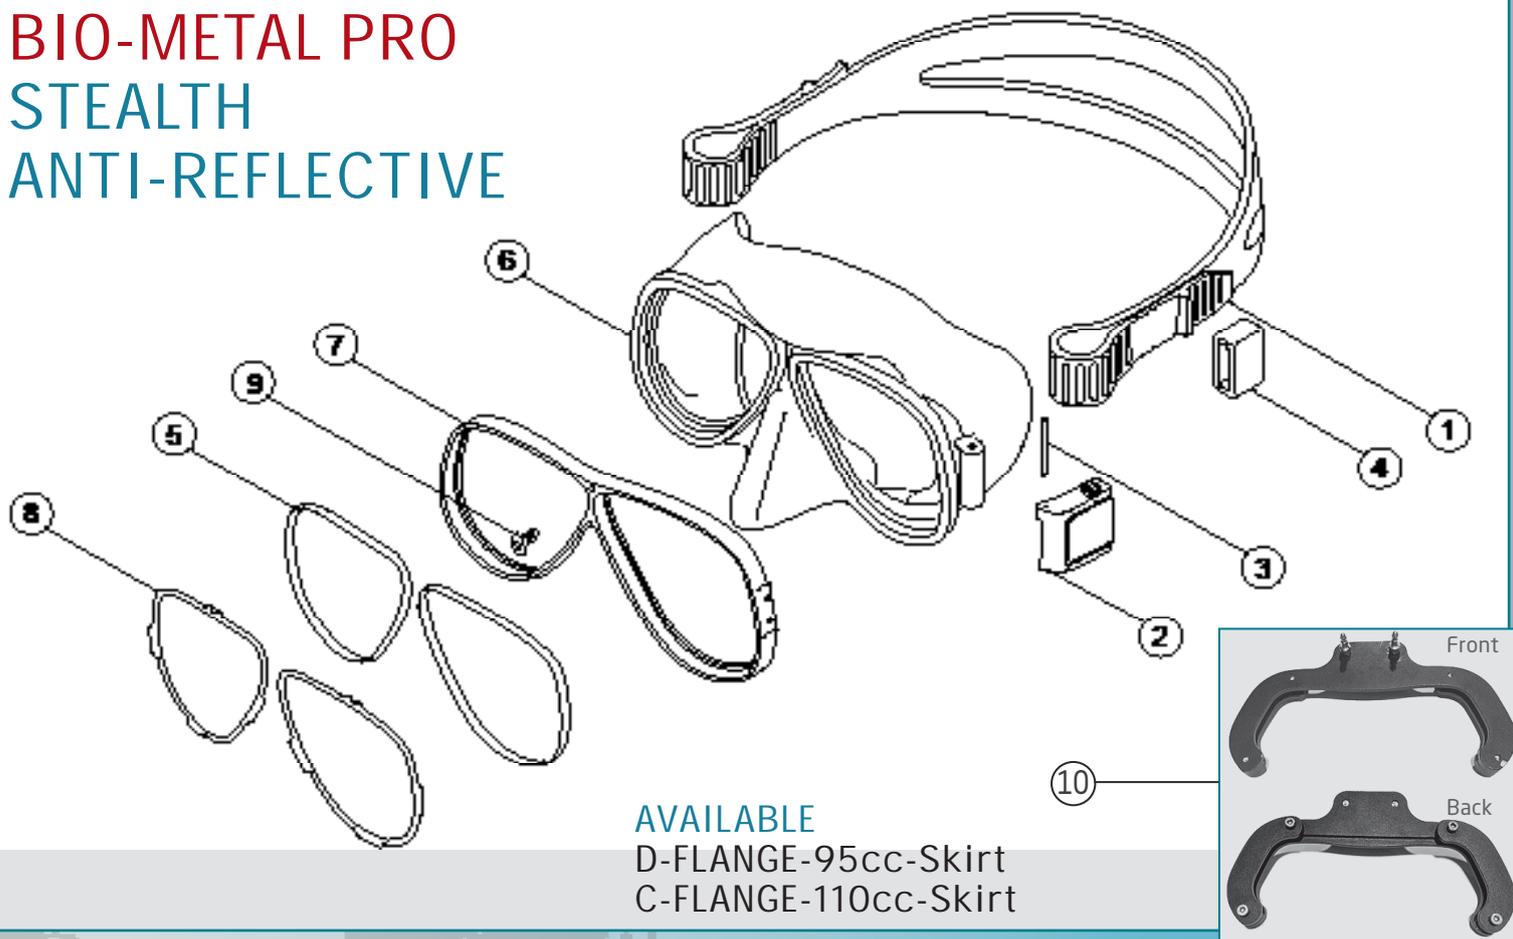

Supplied in a protective fabric bag.
