

Apollo ATB (All Terrain Boot)

The Apollo ATB (All Terrain Boot) is a water-based operational boot engineered for both underwater and above-water environments, making it ideally suited for military, tactical, technical diving and amphibious operations. Designed to perform across varied terrain, the ATB Boot provides secure foot support during shore entries, rocky approaches, vessel boarding, and extended land-water transitions.

Incorporating a 3mm warm super-stretch internal sock, reinforced abrasion-resistant panels and a tactical rubber lugged jungle-style sole, the ATB Boot delivers thermal protection, traction and durability in demanding environments. The lace-up overshoe system enhances ankle stability while reducing water accumulation, and the integrated fast-drain system improves mobility by rapidly expelling water during transition phases

FEATURES

- **Water-Based All Terrain Design** - Engineered for underwater and above-water operations
- **Secure FastDraw Shoelace Loops** - Rapid and secure lace management system for stable fit
- **Instep Internal Fast Drain System** - Promotes rapid water evacuation to reduce weight and improve mobility
- **Tactical Rubber Lugged Jungle-Type Sole** - Provides enhanced traction on wet rock, sand, boat decks and uneven terrain
- **Reinforced High-Abrasion Resistant Toe & Heel** - Increased durability in high-wear areas
- **3mm Warm Super-Stretch Internal Sock** - Thermal protection with flexibility for extended wear

FEATURES

- **Lace-Up Overshoe Support System** - Improves ankle stability and reduces water accumulation inside boot
- **Heel Lug for Fin Strap Retention** - Prevents fin straps from slipping during diving operations
- **Recessed Arch Design** - Enhances compatibility and comfort
- **Fits Most Fin Pockets**

SPECIFICATIONS

SPECIFICATION	DETAIL
Internal Lining	3mm Warm Super-Stretch Sock
Sole Type	Tactical Rubber Lugged Jungle Sole
Drainage	Instep Internal Fast Drain System
Closure	Secure FastDraw Lace System
