

PATRIOT3 MARITIME

P3M delivers next generation gear for the maritime operator. From long range MarOps to Combat Swimmer equipment; our focus is to enhance the effectiveness of the operator in the maritime environment.

REVOLUTIONARY BY DESIGN

COMBAT RUBBER RAIDER CRAFT (CRRC)

Patriot3 Maritime recommends and offers WING Combat Rubber Raiding Crafts. Wing Inflatables manufactures original equipment and replacement sponsons for a large and ever growing number of RIBs. Wing’s use of polyurethane fabric, advanced construction techniques, and superior design ensure that equipping your RIB with a WING sponson is the best choice you can make.

The Wing P series craft are the ideal inflatable boats for missions in which rapid deployment, high performance, and reliability are key assets for success. Whether paddled for stealth or powered for speed, Wing’s CRRCs are designed for a variety of military and law enforcement missions—from combat reconnaissance to search and seizure; from boarding operations to search and rescue; from insertion to extraction of Special Forces teams to maritime patrol. Whatever you need, WING has you covered.

Wing Inflatables is a US owned and operated company based in Northern California. Wing designs and produces inflatable products out of extremely durable, US made polyurethane coated nylon and polyester fabrics, using thermo-bonding and radio frequency welding techniques. Wing can build to most specifications while exceeding any expectation of quality workmanship, product performance and enthusiastic customer support. This is Wing’s commitment and guarantee.

The U.S. Army requires the use of lightweight, low profile transportation for their operators to navigate a variety of aquatic environments. Wing’s P Series Combat Rubber Raiding Craft recently met a challenging set of requirements including mission scopes, team size, storage capacity, weight limits, and land mobility released by the U.S. Army for inflatable boats. Wing Inflatables is now the primary provider of Combat Rubber Raiding Craft’s to the U.S. Army.

MODEL:	P4.2	P4.7	P5.3	P5.8
Overall Length	13'9"	15'5"	17'5"	19'2"
Overall Beam	5'8"	6'6"	7'2"	8'2"
Internal Length	10'9"	12'3"	13'2"	13'10"
Internal Beam	2'8"	3'	3.5'	4'
Tube Diameter	18"	20"	22"	25"
Usable Deck Space	27.0 ft.2	34 ft.2	43.4 ft2	55.0 ft2
Craft Weight - Empty	149 lbs.	180 lbs.	192 lbs.	272 lbs.
Craft Weight w/ Full Composite Hard Deck	242 lbs.	280 lbs.	312 lbs.	446 lbs.
Craft Weight with Roll-Up Floor	226 lbs.	274 lbs.	302 lbs.	N/A
Folded Dimensions	25" x 25" x 52"	27" x 29" x 56"	38" x 38" x 65"	36" x 36" x 81"
Transom Height (Shaft Length)	20"	20"	20"	20"
Max Payload	2,035 lbs.	2,760 lbs.	4,000 lbs.	6,000 lbs.
Person Capacity	8	10	12	15
Max HP Rating (Hard Deck/Roll Deck)	50hp/30hp	65hp	80hp	115hp
Max Engine Weight	235 lbs.	320 lbs.	345 lbs.	420 lbs.

RESEARCH & DEVELOPMENT

Patriot3's (P3X) engineering is a bold and visionary team of highly skilled professionals that provides innovative products to assist in stealth and safety operations. P3X uses the principles of energy, material science, electronics and mechanics to design and manufacture machines and equipment of all types used by Military and Law Enforcement agencies worldwide. Using top level analysis, design, and synthesis, P3X puts new, exciting products into the hands of customers using the latest technology and progressive ideas.

ABOUT PATRIOT3

THE COMPANY

Patriot3, an American owned Small Business began operations in Quantico, Virginia in May 2000 to provide specialized equipment for Special Forces and Law Enforcement worldwide. Today, Patriot3 has four divisions that include, Ballistic Products, Elevated Tactics Systems, Maritime and Kinetics.

Patriot3 employs a full staff of Engineers, Sales and Field Representatives, Office and Production personnel at their Corporate Headquarters in Fredericksburg, Virginia. Day-to-day operations are much the same today as they were in the beginning. Patriot3's dynamic staff enjoys meeting the challenges of development, engineering, manufacturing, marketing and training of unique, state of the art tactical and maritime equipment.

Patriot3 enjoys a reputation as a premier provider and authority in tactical operations and specialty maritime products, as well as being a leader in innovation and winner of the prestigious Spirit of NTOA, Small Business Administration's Exporter of the Year and GovSec Homeland Security Awards. Patriot3 has products in operation all over the world and has exported to more than 40 countries.

Patriot3 strives to offer next generation products developed for unprecedented mobility and ease of use that address their client's latest challenges. Patriot3 always has numerous new products in all stages of development as well as continuing to upgrade and refine products currently in use.

Patriot3 Associates are eager to work with operators to find simple, viable solutions for the challenges they encounter in the field as well as ensuring Patriot3 products remain cutting edge and a step above.

Patriot3 Maritime

Patriot3 offers a variety of innovative specialty equipment for waterborne operations. Our products are designed to enhance mobility, stealth and quick-strike capabilities in unforgiving environments.

Patriot3 Elevated Tactics

Patriot3 is the worldwide leader in Elevated Tactics Systems (ETS). Our vehicle mounted systems permit elevated access to buildings, aircraft, trains and buses; assisting special units and rescue teams to take control of difficult situations.

Patriot3 Ballistics

Patriot3 is a premier provider of lightweight, mobile ballistic products and shields. Our product line includes a wide range of patented personal protection shields, ballistic fragmentation systems and mobile ballistic barriers.

Patriot3 Kinetics

Patriot3's newest division, P3K, was established to develop and manufacture ballistic measurement and instrumentation for tactical, military and ballistic test range applications. P3K also performs research, design, development, integration and support of ground based radar and airborne sensor systems designed to operate in severe and demanding environments.
