

EDGE 3mm Semi-Dry Diving Hood

The Apollo EDGE 3mm Semi-Dry Diving Hood is a rugged, unisex neoprene hood engineered for tactical and defence diving applications requiring thermal protection with minimal bulk. Designed to integrate seamlessly with drysuit and semi-dry suit neck seals, this hood enhances diver comfort and operational effectiveness in cool to temperate water conditions.

Constructed from 3mm neoprene with a smoothskin face seal and black jersey lining, the EDGE hood limits water flow, reduces heat loss around the head and neck, and supports extended mission durations without compromising mobility or situational awareness.

FEATURES

- **3 mm Neoprene Construction** – Balanced thermal protection with low bulk for extended operations in cool water.
- **Semi-Dry Short Skirt Design** – Interfaces with drysuits and semi-dry suit seals to reduce flushing and heat loss.
- **Smoothskin Face Seal** – Minimises water ingress and flushing for improved thermal performance.
- **Black Jersey Lining (Inside & Out)** – Durable and comfortable liner suitable for extended wear.
- **Unisex, Tactical Finish** – Stealth black colouring suitable for defence and special operations.
- **Available in Multiple Sizes** – Ensures optimal fit across operators.

SPECIFICATIONS

SPECIFICATION	DETAIL
Configuration	Semi-Dry Diving Hood
Material	3 mm Neoprene
Seal Type	Smoothskin Face Seal
Lining	Black Jersey (inside & out)
Colour	Tactical Black
Compatibility	Designed to mate with drysuit & semi-dry suit neck seals
