

SQR PRO HRC50 Titanium Knife

The Apollo KN10350P – PRO Version Divers SQR Knife is a mission-grade cutting tool engineered for military, clearance diving and tactical maritime operations requiring a low magnetic signature profile. Manufactured from HRC 50 Titanium, the blade provides exceptional corrosion resistance, strength and durability while minimising magnetic interference in sensitive operational environments.

The PRO configuration is supplied with a heavy-duty Kydex sheath, offering enhanced retention, durability and rapid deployment capability. Designed for secure mounting to leg straps, harness systems or tactical load-bearing platforms, the KN10350P delivers dependable cutting performance for entanglement scenarios, line cutting and underwater utility tasks.

FEATURES

- **HRC 50 Titanium Blade** - High-strength titanium construction with superior corrosion resistance.
- **Low Magnetic Signature Construction** - Titanium primary structure reduces magnetic presence; minor components may contain trace magnetic properties.
- **SQR Blade Profile** - Straight and serrated cutting edges for versatility in rope, webbing and line cutting.
- **PRO Version – Kydex Sheath** - Rigid, high-retention sheath enabling secure carry and rapid single-handed deployment.
- **Saltwater Corrosion Resistant** - Titanium blade eliminates rust concerns in marine environments.
- **Ergonomic Handle Design** - Secure grip when used with gloved or bare hands.
- **Heavy-Duty Mounting Options** - Compatible with leg straps, harness systems and tactical dive platforms.

OPERATIONAL ADVANTAGES

- **Reduced Magnetic Presence** — Suitable for operations where minimised magnetic signature is required.
- **Rapid Access & Secure Retention** — Kydex sheath improves deployment speed and retention integrity.
- **Low Maintenance Burden** — Titanium blade resists corrosion and requires minimal upkeep.
- **Mission Versatility** — Effective for entanglement emergencies and underwater cutting tasks.
- **Durable Under Repeated Use** — Engineered for operational longevity in harsh marine environments.

SPECIFICATIONS

SPECIFICATION	DETAIL
Blade Material	HRC 50 Titanium
Blade Type	SQR Profile (Straight & Serrated Edge)
Magnetic Profile	Low Magnetic Signature (Not Fully Non-Magnetic)
Sheath	Kydex Tactical Sheath (PRO Version)
Corrosion Resistance	Saltwater Resistant / Non-Rusting Blade
Mounting	Leg Strap / Harness Compatible

PRODUCT DATA

SKU	DESCRIPTION
KN10350P	SQR PRO HRC50 Titanium Knife, BK, Blade 125mm, w/ Neoprene & Kydex Sheaths
