

KEVLAR GLOVE

The Apollo Kevlar Glove is a rugged, high-durability neoprene dive glove engineered for commercial, technical and defence diving operations that demand robust hand protection, thermal performance, and lasting durability. Constructed with 3 mm neoprene insulation, this glove offers effective warmth in cool or temperate water while maintaining dexterity and tactile control.

Reinforced with Kevlar-lined palms, fingers and fingertips, the glove provides exceptional abrasion resistance and strength for demanding underwater tasks, line handling, equipment manipulation and contact with rough surfaces.

FEATURES

- **3 mm Neoprene Construction** – Provides thermal insulation with good flexibility for extended cold-water use.
- **Kevlar Reinforced Palms & Fingers** – High-strength Kevlar lining on palms, fingers and fingertips increases cut-, abrasion- and wear-resistance in challenging conditions.
- **Enhanced Durability** – Designed for rigorous operational use and repeated deployment cycles.
- **Unisex Design** – Available in a range of sizes to fit diverse operators.
- **Black Finish**

SPECIFICATIONS

SPECIFICATION	DETAIL
Material	3 mm Neoprene
Reinforcement	Kevlar lining on palms, fingers & fingertips
Colour	Black
Care	Rinse with fresh water and dry out of direct sunlight. Store in ventilated dry area.
