

# TAS2 SAR Buoyancy Compensator

The Apollo TAS2 SAR Buoyancy Compensator (BC) is a robust, mission-configured buoyancy system developed specifically for Search and Rescue (SAR), military and professional diving operations. Designed for operational durability and load-bearing capability, the TAS2 SAR integrates high-lift buoyancy with a secure harness system, allowing divers to operate effectively while carrying additional rescue, recovery or tactical equipment.

Constructed from heavy-duty materials suitable for repeated field deployment, the TAS2 SAR provides stable trim control, reliable inflation/deflation performance and enhanced surface flotation. Its rugged design supports both operational diving and surface support tasks, including casualty assistance and equipment handling. Engineered for reliability in demanding marine environments, the TAS2 SAR is a mission-ready buoyancy platform for defence and emergency response teams.

## FEATURES

- **High-Lift Buoyancy Cell** - Provides substantial surface support and controlled underwater trim.
- **Heavy-Duty Construction** - Abrasion-resistant materials suitable for professional SAR and defence use.
- **Secure Harness System** - Adjustable shoulder, chest and waist straps for stable load distribution.
- **Integrated Weight System** - Quick-release configuration for operational safety (model dependent).
- **Multiple Stainless Steel D-Rings** - Attachment points for rescue tools, reels, lift devices and ancillary equipment.
- **Power Inflator with Oral Backup** - Reliable inflation/deflation control with manual override capability.
- **Enhanced Surface Stability** - Designed to support diver and additional load at the surface.

## SPECIFICATIONS

SPECIFICATION	DETAIL
Type	Jacket-Style Buoyancy Compensator
Inflation System	Power Inflator with Oral Backup
Lift Capacity	High-Lift Design (Exact lift dependent on size)
Construction	Heavy-Duty Marine-Grade Fabric
Attachment Points	Multiple Stainless Steel D-Rings
Weight System	Integrated / Quick-Release (Model Dependent)

## PRODUCT DATA

SKU	DESCRIPTION	NSN
BC02431	TAS Lift BCD 13kg, BK, Unifit	N/A
